

## **A KIDNEY FOR STONEY**

I was diagnosed with PKD (Polycystic Kidney Disease) in August 2011. My disease has gotten worse (Stage 5) causing my kidneys not to work well. Both my kidneys together are only functioning at 12%. This is what I am facing now, and my treatment options are limited to a kidney transplant. My best chance of survival lies in the hands of someone willing to be a living kidney donor. The wait for a deceased donor kidney can be more than 5 years. I'm actively pursuing a kidney from a living donor.

If donating a kidney to me is something you would like to consider, please contact me at <u>AKidneyforStoney@gmail.com</u>

My health insurance covers evaluation process, surgery & post op for donor.
